

HORNS – VEHICLE SPECIFIC

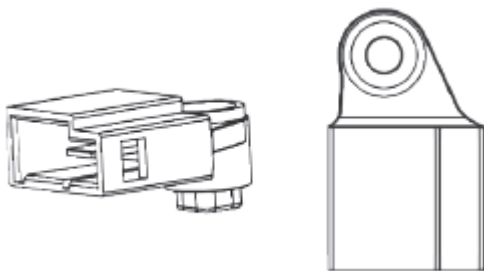

” Each vehicle now has its own horn”

HMEA has now added in its Horn range the Vehicle Specific-Horns.

We are proud to announce that the following brand’s horns were launched:

- BMW
- Volkswagen
- Toyota
- Audi
- Mercedes Benz
- Ford
- Hyundai
- Honda

Each horn will have the vehicle specific connectors (example below):

Toyota connectors

This range will offer:

PRESS RELEASE

- A Harmonic tone and wide sound emission
- A Strong acoustic signaling for increased traffic safety
- An Optimal range of sounds if you install a game with low pitched tone
- A horizontally or vertically mounting possibility

These horns will consume 2 times 72W for a 12V nominal tension.
The frequency is 400/500Hz with 113 Db.
They can bear a temperature range between -40° to 80°.

For all these brands, we can offer now a trumpet horn, for Toyota we can offer also the disc horn.

This Dual tone electric horn with a higher corrosion protection and a guaranteed brand quality Long tested life.

All these horns have their own specific connectors, so the workshop can plug them directly to the car without any other wire cutting or additional connections, this allows a real gain of time and a proper installation.”
